

## **REVOLUTIONISE THE WAY YOU BUY & STORE FOOD!**

Introducing a brand new product from **Hillmark** – the Australian company who has brought you the market-leading **Ezidri** dehydrators and the sizzling **Anuka** Electric Food Smoker.

The **Ezivac Vacuum Packing System** makes a great addition to every kitchen — once you've tried it, you'll quickly wonder what you did without it!

By using this high-quality, Italian-made system you can **retain the freshness & flavour of your food for up to 5 times longer**, whether it is kept in the pantry, fridge or freezer. And in doing so, you'll reduce the amount of food & money you waste!

Oxygen in the air causes food to deteriorate, causing the loss of nutritional value, flavour & quality. In addition to this, air promotes the growth of micro-organisms and is responsible for freezer burn.

The **Ezivac** extends the shelf life of food by **removing over 70% of the air** which in turn reduces oxidation & prevents microbes like bacteria & mould from ruining your food.

It's perfect for fresh food & is also fantastic for increasing the life of dehydrated delicacies created with the **Ezidri** dehydrator!

The best part is, it's so easy! **Unlike other models** on the market, the **Ezivac** system has **fully-automatic operation** so you don't have to do anything during the vacuum & sealing process!

This vacuum packing system is **all about saving time & money**. Use the **Ezivac** to package your food in handy portions & save preparation time. Take advantage of bulk specials without the worry of spoilage. That means fewer trips to the supermarket!

**What's more, the Ezivac makes it possible to marinate in minutes!** Food marinated & vacuum packed will be as infused with flavour after 20 minutes as if left overnight!

The Ezivac is **perfect for families** looking for ways to save time & money and **home gardeners** needn't let their home-grown favourites go to waste – vacuum packing will keep them fresh & tasty for longer. **Fishermen** can make every catch count & keep their frozen fish full of flavour for up to 12 months!

For **off-road & outdoor adventurers**, even when space is at a premium there's no need to sacrifice flavour or freshness because The **Ezivac** teams up brilliantly with the **Ezidri** dehydrators to create the perfect menu for the next trip away.

Everyone can get piece of mind from preserving their food the **all-natural** way – with the **Ezivac**, there's no need for chemicals or additives. Not close to a supermarket? Not a problem - by vacuum sealing with the **Ezivac**, fresh & flavourful ingredients can be available every day no matter where you are.

**At just \$349 RRP, the Ezivac is a must-have for lovers of fresh food that's full of flavour and makes a great gift idea all-year round.**
